2. Faculty
3. University Management

External Stakeholders:
1. Campus Security
2. Vendors

Interview 1

Interviewer	Primary Interviewee	Secondary Interviewee
Mr. James Anderson	Ms. Sarah Adams	Mr. David Brown

Notes from the interview

Q1. At what time the entrance is most busy?

Ans. Usually 2 days a week, when a lot of students have classes at the same time. It's Monday, Tuesday, Friday. Mostly due to traffic or due to the new batch that is coming in together than other batches in the past.

Q2. What are the most frequent problems faced by students during entrance?

Ans. Queue problems, road issues.

Q3. Are you allowed to open the second gate for students if they are getting late for classes?

Ans. We cannot open the second gate for entrance, but in an emergency because it does not require students to enter the campus in the university or not. The entrance and exit of students are managed through the scanner.

Q4. Does the overcrowding of students raise security concerns for students or campus?

Ans. Overcrowding may raise security concerns for students and a potential risk. But if they are managed properly, it can be managed. The security of the campus must be there by primary and a minimum of 10 people must be there to manage the situation.

Q5. Why can't students enter campus from gate 2?

Ans. The facility, space management designed a specific route for the entrance and exit. Gate 2 will be used for the exit only. The entrance will be managed by the security team. A security team will have to face that. Nevertheless, students are not allowed to leave the campus from gate 2, as they are not a valid transport from there.

Interview 1

Q6. What solution do you propose to this problem?

Ans. They are currently looking on the installation of new turnstile which will help enter and exit process to be completed faster.

Q7. How do you think your solution will be effective in solving the problem?

Ans. This solution will be effective for short term but for long term permanent solution, students are requested to follow the rules of entrance and exit. Students on personal vehicles are requested to get stickers from security department and park their vehicles underground. Students on public transport are requested to use gate 4. This will decrease the number of people in the queue.

Key takeaways

Interview 2

Interviewer	Primary Interviewee
Mr. James Anderson	Ms. Sarah Adams

Notes from the interview

Currently using gate 4, usually uses gate 3.

Monday are hectic as the whole 2026 batch has a class at 8.

Using turnstile is not necessary, the alternative gate can be used to speed up the entry.

Gate 3 has no issues currently as the shorter path is being utilized due to construction usually gate 3 has a very long route to enter university.

Usually Mondays are the most crowded.

Recently scanners are lagging a lot.

Gate 2 should be accessible too.

Interview 3

Interviewer	Primary Interviewee
Mr. James Anderson	Ms. Sarah Adams

Notes from the interview

Question 1. Which gate do you use to enter?
Ans. Gate No. 4

Question 2. What is your overall experience when entering through gate no. 4?
Ans. The turnstile system is very inconvenient. She arrived at 8:10 and faced a huge queue at the entrance. She had to wait 10 minutes to enter. She had to come very early and has to wait a lot.

Question 3. Is there any issue that you face regarding the entrance to the gate?
Ans. Yes.

Question 4. How often do you face the difficulty?
Ans. About three times a week, usually from 8:10 and onwards.

Question 5. Do you face any issues with scanning your cards?
Ans. Yes, sometimes you tap your card and it doesn't respond, so you have to wait.

Question 6. What consequences have you faced (if any) due to the entrance issue?
Ans. She was late for the first class of the day (first term).

Question 7. What solution would you propose for this issue?
Ans. She would prefer faster turnstile and she'd do more gates.

Question 8. Do you have any potential danger when you are waiting in the queue?
Ans. Yes, the risk of getting a traffic.
