Interview 1

Interviewer	Primary Interviewee	Primary Interviewee
Interviewer	Gate 2 Interviewee	Interviewer

Notes from the interview

Q1. At what time the entrance is most busy?

Ans. Usually 2 days a week when a lot of students have classes at the same time. It's Monday, Tuesday, Friday. Mostly due to traffic it's due to the new batch at it's relatively larger than other batches in the past.

Q2. What are the most frequent problems faced by students during entrance?

Ans. Queue problems, road issues.

Q3. Are you allowed to open the second gate for students if they are getting late for classes?

Ans. We haven't opened the second gate for entrance, but it's not recommended because it does not allow students to enter the campus in the university or not. The entrance and exit of students are managed through the scanner.

Q4. Does the overcrowding of students raise security concerns for students or campus?

Ans. Currently, they are working on it. There is a security gate. But if they let students in, they will have to manage the security of the campus. There is a security gate and a lot of students have to go to the gate.

Q5. Why can't students enter campus from gate 2?

Ans. The faculty, staff, and the security guard are not allowed to enter the campus. Gate 2 will be closed to the students and the security guard. If there is a problem with the entrance, the staff will have to face that. However, students are still allowed to leave the campus from gate 2, as they are not security guards.

Interview 1

Q6. What solution do you propose to this problem?

Ans. They are currently looking on the installation of new turnstile which will help water and exit process to be completed faster.

Q7. How do you think your solution will be effective in solving the problem?

Ans. This solution will be effective for short term but for long term permanent solution, students are requested to follow the queue of entrance and exit. Students on personal vehicles are requested to get stickers from security department and park their vehicles underground. Students on public transport are requested to use gate 4. This will decrease the number of people in the queue.

Interview 2

Interviewer	Primary Interviewee
Interviewer	Gate 2 Interviewee

Notes from the interview

Currently using gate 4, usually uses gate 3.

Monday are hectic as the whole 2028 batch has a class at 8.

Using turnstile is not necessary, the alternative gate can be used to speed up the entry.

Gate 3 has no issues currently as the turnstile is being utilized due to construction usually gate 3 has a very long route to enter university.

Usually Mondays are the most crowded.

Recently scanners are lagging a lot.

Gate 2 should be accessible too.

Interview 3

Interviewer	Primary Interviewee
Interviewer	Gate 2 Interviewee

Notes from the interview

Question 1. Which gate do you use to enter?

Ans. Gate No. 4.

Question 2. What is your overall experience when entering through gate no. 4?

Ans. The turnstile system is very inconvenient. She arrived at 8:15 and faced a huge queue at the entrance. She had to wait 10 minutes to enter. She has to come very early and has to wait a lot.

Question 3. Is there any issue that you face regarding the entrance to the?

Ans. Yes.

Question 4. How often do you face this difficulty?

Ans. About three times a week, usually from 8:10 and onwards.

Question 5. Do you face any issues with scanning your card?

Ans. Yes, sometimes you tap your card and it doesn't respond, so you have to wait.

Question 6. What consequences have you faced (if any) due to the entrance issue?

Ans. She was late for the first class of the day (first class).

Question 7. What solution would you propose for this issue?

Ans. She would prefer faster turnstile and she'd do more gates.

Question 8. Do you face any potential danger when you are waiting in the queue?

Ans. Yes, she feels that it's a risk.
