

RESEARCH PARTICIPATION - INFORMED CONSENT

Assess the level of public awareness for Rabies
Group 5

I, hereby, provide my **informed consent** to **voluntarily participate** in the research project, of Group 5- supervised by Dr. Humaira Qureshi at Habib University, Karachi Pakistan. I understand that the project is on Rabies Infection and that research objectives are to assess the level of public awareness, understanding, and preventive practices regarding rabies infection and its control methods. My participation will require involvement in responding to a survey and participating in a short semi-structured interview.

1. My participation in this project is **voluntary**. I understand that I will not be paid for my participation. I may **withdraw** and discontinue participation at **any time without penalty**. If I decline to participate, or if I withdraw from the study, no data relating to me will ultimately be used in research reports/publications or related dissemination of findings.

2. I understand that some sensitive subject matters may be discussed, and that I have the right to **decline to answer any specific question** or refuse to delve deeper in a subject which I may be uncomfortable and unwilling to address.

3. Participation will require **approximately 40–50 minutes** of my time for the survey and interview combined of my time.

4. I understand that the researcher(s) involved will take notes and that data gathering activities may involve **audio or video recording to facilitate transcription and analysis**. I have the right to request not to be recorded, although this may impair my participation in some aspects of the study, if this compromises the quality of the data accessible to the researcher(s).

5. As a subject matter expert, I provide consent to be named and identified in publications and in related research dissemination activities. I will "tick" the box below to confirm this agreement, though I understand that for matters of safety/security, the researcher may choose to maintain my anonymity despite my consent to be identified.

6. Subsequent uses of records and data will be subject to standard data use policies, which protect the anonymity of individuals and institutions. As such pseudonym and/or alpha-numerical coding of the data and meta data, will provide **added assurance of anonymity and confidentiality**. No one, aside from the principal investigator and associated researchers directly involved in data gathering/transcribing, will be able to identify me.

7. I understand that **confidential information, such as personal information, or any markers which could lead people to identify me, or contact me, will remain private under the strictest of conditions**. During data gathering activities, I also have the right to request that certain information shared be kept private as "off the record."

8. I understand that the **data and meta data will be used to inform reports, publications, conference presentations** and other means of public dissemination of findings.

- ☐ I have read and understand the explanation provided to me. I had the chance to ask questions and these have been answered to my satisfaction.

As a subject expert, I agree to be identified:
